

## Statistics Course Weekly Work-Time Report

Name: \_\_\_\_\_

Week beginning on Monday \_\_\_\_\_ (yy/mm/dd).

The number of minutes I spend directly working on the statistics course in this week is \_\_\_\_\_ minutes.

Is the above time based on tracking your work sessions to the nearest five minutes or is it only an estimate? Check one:

the time is based on tracking work to the nearest five minutes

the time is only an estimate.

The time you report above will *not* be used in determining your marks or grades in the course—the time will only be used to provide data to help determine whether students who spend more time working on this course get higher marks.

The time you report on this form will be shown to other students (linked to your marks on the tests and examinations in the course). However, you will not be associated in any way with the times or the marks. In the version shown to other students all the marks and times will be anonymous. But note that if you tell other students your work-time, they may be able to infer your mark.
